

Use Case Name

Add Book

Actors

Book Reviewer - The only person interacting with the application is the Book Reviewer

Administrator – A user who edits, add, and manages the application

Main Flow

- Book Reviewer launches application
- Book Reviewer adds a book (includes)

Priority 1

- This is the most important use case as the other use cases assume this one has been completed.

Status

Outlining Application functionality, will never develop app

Pre-Conditions

Book Reviewer must have loaded the application

Post-Conditions

Book Reviewer must have added a book

Extension Points**“Used” Use Cases**

Use Case Name

Book Profile

Actors

Book Reviewer - The only person interacting with the application is the Book Reviewer

Main Flow

- Book Reviewer launches application
- Book Reviewer selects a book

Priority 2

- This is vitally important so that the user can view book information (which is the whole point of the application)

Status

Outlining Application functionality, will never develop app

Pre-Conditions

Book Reviewer must have loaded the application

Book Reviewer must have already added a book

Post-Conditions

Book Reviewer must have added a book

Extension Points**“Used” Use Cases**

Use Case Name

Log Hours

Actors

Book Reviewer - The only person interacting with the application is the Book Reviewer

Main Flow

- Book Reviewer launches application
- Book Reviewer selects a book
- Book Reviewer selects “Log Hours”
- Book reviewer add hours

Priority 3

- This is important but only as extra functionality for the user

Status

Outlining Application functionality, will never develop app

Pre-Conditions

Book Reviewer must have loaded the application

Book Reviewer must have added a book

Book Reviewer must already have selected a book profile

Post-Conditions

Book Reviewer must have added a book

Hours must have been updated

Extension Points**“Used” Use Cases**

Use Case Name

Log Insights

Actors

Book Reviewer - The only person interacting with the application is the Book Reviewer

Main Flow

- Book Reviewer launches application
- Book Reviewer selects a book
- Book Reviewer selects “Log Insights”
- Book reviewer adds thoughts while reading the book

Priority 3

- This is important but only as extra functionality for the user

Status

Outlining Application functionality, will never develop app

Pre-Conditions

Book Reviewer must have loaded the application

Book Reviewer must have added a book

Book Reviewer must already have selected a book profile

Post-Conditions

Book Reviewer must have added a book

Insights must have been updated

Extension Points**“Used” Use Cases**

Use Case Name

Log Hours

Actors

Book Reviewer - The only person interacting with the application is the Book Reviewer

Main Flow

- Book Reviewer launches application
- Book Reviewer selects a book
- Book Reviewer selects “Log Review”
- Book reviewer places a written critique or review

Priority 1

- This is very important because it’s the whole point of the app

Status

Outlining Application functionality, will never develop app

Pre-Conditions

Book Reviewer must have loaded the application

Book Reviewer must have added a book

Book Reviewer must already have selected a book profile

Post-Conditions

Book Reviewer must have added a book

Reviews must have been updated

Extension Points**“Used” Use Cases**
